

1.Title: Online GYM Management System

2. Project Statement:

The project aims to develop a user-friendly web application that facilitates the Gym Management Software is a gym and health club membership management system. You can keep records on your members, their memberships, and have quick and easy communication between you and your members. Gym Management also includes a booking system, point of sale, banking, accounting, concessions and has a range of reports that help in the management of your club.

Outcomes:

Our Gym Management Software is a complete gym and recreation facility system program which looks after all of your members, memberships and activities. It is designed for gyms, recreation center, and health clubs.

Enhance customer satisfaction by offering a seamless and user-friendly interface.

3. Modules to be implemented

1. User Authentication and Registration
2. Gym Slot Scheduling Interface
3. Slot availability Management
4. Slot Booking Information Management
5. FeedBack Management
6. Notification System
7. Admin Dashboard

4. Week-wise module implementation and high-level requirements with output screenshots

Milestone 1: Weeks 1-3

Module 1: User Authentication and Registration

- Implement user registration functionality.
- Develop user login mechanism.
- Integrate email verification and password reset features.
- Output screenshot:
